## **Cantiere delle Marche inaugurates its new dock**

Cantiere delle Marche officially opened a new private dock with four mooring spots suited to host yachts up to 45 metres located inside the safe waters of the Marina Dorica in Ancona, on the Italian Adriatic coast. It has been designed and built like a small and luxury private marina.

With a length of around 40 metres the dock has a total surface of around 500 square metres. Storages are at yachts' disposal while a large area can host launching parties and other events. Equipped with shore power connections, fresh water and compressed air outlets, the new dock allows the yard to host its yachts after the launching for the final outfitting and warranty works but also will be available for refitting works and ancillary activities, repairs and maintenance interventions thanks to its proximity to the yard's main facilities.

CdM new private dock will further enhance the effectiveness of the Pre-owned Sales Department as it offers fully equipped berths for yachts and a welcoming ambiance for both Owners and crews within a gated area.

### **Main Data**

- 4 berths
- 4.5m depth
- Fresh water connection
